SUMMARY

Frontend Software Engineer with hands-on experience building scalable, data-heavy web applications using React, TypeScript, and Redux. Strong focus on UI/UX quality, testing, and maintainable code. Experienced working in cross-functional teams and delivering production-ready features.

EDUCATION

An-Najah National University, Nablus — Bachelor's in *Computer Engineering*

Sep 2019 - Jul 2024

EXPERIENCE

Foothill Technology Solutions – Software Frontend Engineer

May. 2024– present

- Developed and maintained complex, data-heavy frontend features using React, TypeScript, and Redux in a large SaaS application.

- Designed and refined responsive, user-friendly UIs, integrating with backend services and REST APIs while keeping state and business rules consistent.

- Improved quality and reliability by implementing and maintaining **Cypress end-to-end** and **frontend integration tests** for critical user flows.

- Worked closely with product managers, QA engineers, and backend teams to refine requirements, improve testability, and ship reliable features on time.

Freelance Frontend Developer (Upwork & Independent Clients)

(Upwork Profile · Featured LinkedIn Project)

Oct. 2022 – present

- Delivered multiple client-facing applications using **React, Next.js, and Firebase**, from requirements gathering to deployment.

- Designed and implemented **responsive UIs** and Integrated REST APIs and experimented with **GraphQL queries** for structured data fetching.

- Built trust with clients by completing projects on time and ensuring maintainable codebases.

Foothill Technology Solutions – Frontend Internship

(Final Project - Github)

March. 2023– July, 2023

Gaza Sky Geeks (GSG) – React Trainee

(Final Project - Github)

Sep. 2022 – Dec. 2022

AWARDS

2nd Place at Innovators Hackathon. LinkedIn Post.

SKILLS

Programming & Markup:

JavaScript (ES6+), C++, HTML5, CSS3.

Frameworks & Libraries:

ReactJS, Next.js, Cypress, Material-UI, TailwindCSS.

Backend & Platforms:

Node.js, Express, MongoDB (basic), GraphQL (learning), AWS (familiar with core services).

Tools & Practices:

Git, REST APIs, Agile development, OOP, Data Structures & Algorithms.

LANGUAGES

Arabic: Native

English: Very Good
