EDUCATION

An-Najah National University, Nablus — Bachelor's in *Computer Engineering*

Sep 2019 - present

Holy Quran Academy School, Nablus — *High School*

Sep 2012 - July 2019 , Avg: 91.9%

EXPERIENCE

Foothill Technology Solutions – Frontend Internship

March. 2023– present

Gaza Sky Geeks (GSG) – React Trainee

Sep. 2022 – Dec. 2022

- Built reusable UI components, with a focus on maintaining code quality.
- Built and maintained single-page applications using React and Context.
- Improved my teamwork skills, while implementing real world projects.
- Improved my knowledge of React's syntax, including JSX, state management, and lifecycle methods, as well as using helpful React libraries such as Material-UI.

Freelance Project ([LinkedIn Post](#))

Oct. 2022 – Nov. 2022

- Experience in building and deploying full-stack web applications using the MERN stack, with a strong understanding of RESTful APIs and CRUD operations.
- Implemented a dynamic and responsive user interface using React, integrating with a MongoDB database through the Express framework for data management.
- Delivered a fully functional web application that met all project requirements and satisfied the client's needs.
