SUMMARY

Frontend Software Engineer with hands-on experience building scalable, production-grade web applications using React, React Native, and Next.js.

Experienced in component-based frontend architectures, collaborating with product and backend teams, and improving performance, accessibility, and UX in complex systems.

EXPERIENCE

Foothill Technology Solutions – Software Frontend Engineer

May. 2024 – present | Nablus, Palestine | [link](#)

- Developed and maintained complex, data-heavy frontend features using React and TypeScript, focusing on scalable component architecture and performance.
- Designed and refined responsive, user-facing UIs with strong attention to usability and consistency, integrating seamlessly with backend services and REST APIs.
- Improved quality and reliability by implementing Cypress end-to-end and integration tests, while contributing to code reviews and maintaining high code standards.
- Actively used AI-assisted development workflows to speed up development, debug complex issues, and experiment with AI-driven features and developer tooling.

Upwork – Freelance Frontend Developer

Oct. 2022 – present | Remote | [link](#)

- Delivered multiple client-facing applications using React, Next.js, and Firebase, from requirements gathering to deployment.
- Designed and implemented responsive, client-facing UIs, integrating REST APIs and experimenting with GraphQL for structured data fetching.
- Built trust with clients by completing projects on time and ensuring maintainable codebases.

Foothill Technology Solutions – Frontend Internship

March. 2023 – July, 2023 | Nablus, Palestine | [link](#)

- I gained hands-on experience in developing and deploying web applications using React and its ecosystem.
- I had the opportunity to work with a talented team of developers and learn from them.
- A significant highlight was my proficiency in React, using TypeScript to create robust user interfaces.

EDUCATION

An-Najah National University — Bachelor's in Computer Engineering

Sep 2019 - Jul 2024 | Nablus, Palestine

SKILLS

Programming & Markup:

JavaScript (ES6+), TypeScript, C++, HTML5, CSS3.

Frameworks & Libraries:

ReactJS, Next.js, Material-UI, TailwindCSS, Shadcn, Redux, Context API, Cypress.

Backend & Platforms:

Node.js, Express, MongoDB (basic), GraphQL (learning), AWS (familiar with core services).

Tools & Practices:

Git, REST APIs, Real-time communication (SignalR), Agile development, UI testing (Cypress, Jest), OOP, Data Structures & Algorithms.

AI-Assisted Development: Opencode, Claude CLI, MCP workflows, context engineering.

AWARDS

2nd Place at Innovators Hackathon. [LinkedIn Post](#).

LANGUAGES

Arabic: Native

English: Very Good
